CLOUD ASSESSMENT

THE CLOUD PURPOSE BUILT FOR YOUR ORGANIZATION

LightEdge is changing the way you think about public cloud, offering the agility and flexibility you demand from the cloud. We believe the cloud should be tailored to your organization's unique needs, whether those needs involve compliance, security, business continuity, disaster recovery, or just ensuring user-friendliness. We are the enterprise cloud solution that embraces a wide range of workloads, including cloud-native applications built on containers and microservices, as well as those legacy applications you can't seem to find a replacement for. Our flexible resource pools allow you to build and resize workloads dynamically with predictable, surprise-free billing, all while being more cost-effective than traditional hyperscalers. We provide colocation services in the same facilities as our cloud, allowing seamless integration and management for your hybrid infrastructure.

Most importantly, our 100% US-Based support team is here for you 24/7/365 to answer your questions, solve your problems, and watch over your infrastructure with our proactive management and monitoring services. When we identify an issue, we provide timely, transparent, and easy-to-understand communication. We answer your questions and help you solve the problem quickly. Real people with real answers to your questions means that you don't have to take the cloud journey alone.

WHAT CAN THE CLOUD DO FOR YOU?

CERTIFIABLY SECURE, WE PROVE IT

Our compliance and security experts take the guesswork out of keeping your business and its vital data protected. We pass our compliance expertise and security benefits onto you through our colocation and cloud services.

SECURITY-FIRST NETWORKING

Integrated microsegmentation, flexible firewalling, and the ability to integrate with security platforms you've already invested in means your cloud stays safe and secure.

INNOVATION THROUGH AUTOMATION

API driven and Infrastructure-as-Code ready, our cloud keeps up with your CI/CD pipeline by integrating with Ansible, TerraForm, and more.

MANAGED DISASTER RECOVERY

Integrated multi-site disaster recovery makes protecting your workloads fast and easy, our Disaster Recovery team is here for you with guided testing and 24/7 disaster response.

HOW IS THIS CLOUD DIFFERENT?

REAL PEOPLE, ALWAYS

We are here, 24/7/365, ready to answer the call. Whether you need urgent help, or just have a question, call us any time!

EASY TO USE, REALLY

Our cloud platform is built for everyone to use with no special training needed to get started.

PREDICTABLE SPEND

Our straight-forward resource pool model means the only surprise on your bill is how easy it is to understand.

100% SLA UPTIME

We guarantee 100% uptime Period. Our networks and platforms are built to back it up.

WE MAKE IT SIMPLE.
